Implementation timeline

Roadmap

Background

The COVID-19 pandemic has impacted the healthcare system in many ways. In the midst of navigating the challenges, it intensified our transformational need to future-proof our healthcare supply chain capabilities to better serve the needs of Singapore's healthcare system. Organisational alignment, effort and agility are key to favourable outcomes for ALPS.

Aims

 To establish and align the organisational long-term growth strategies, map out and visualise the business opportunities and deliverables, and identify key drivers, enablers and resources to support the organisational goals.

 To build a ready, relevant and resilient workforce alongside the organisational strategic goals and transformation that will address current and future needs.

Methodology

ALPS' senior leadership embarked on the Operation & Technology

Roadmap (OTR) exercise, supported by NTUC

Training and Transformation and HSEU.

The process, which comprised of 5 key 01 steps, facilitated the planning of longterm business goals and strategies as well as the strategic considerations for talents, technologies and resources to support the organisational goals.

Other Resource / Capability requirements

Government schemes and initiatives

Results

- A comprehensive roadmap was created; leadership identified drivers impacting key the deliverables and strategies for the next 5 years and resources crucial to meet the organisation's desired goals.
- Leaders are aligned and excited to work towards the organisation's transformation – (see word cloud based leaders' post OTR feedback).
- A Company Training Company has been formed to focus on the actualisation of the transformation roadmap.

Conclusion

The OTR exercise provided a transparent and structured approach, and neutral platform for leaders and key stakeholders to collectively identify shared goals, and commit towards organisational transformation.

Subsequently, the partnership with NTUC, e21 and LHUB was formally sealed. A Memorandum of Understanding was signed to prepare and strengthen our workforce to be ready for future jobs by equipping them with a combination of adaptive, technology and technical skills.
